

Company Profile

ABOUT US

Company Overview

Brodotehna Control Systems is a technology company focused on electrical engineering, automation and advanced control systems.

2013

Founded

20+ Full-time engineers

10 Graduate student

30+

Team members

WHAT WE DO

From Engineering to Implementation

OUR CORE FIELDS

→ **Electrical Engineering**

→ **Computing**

01

Projects

From concept to implementation.

02

Services

Expertise when you need it.

03

Research & Development

Developing what comes next.

PROJECTS

What We Deliver

Complete electrical and control scope.
Delivered **on time** and **within budget**.

End-to-end project delivery

- Engineering & Design
- Equipment delivery
- (Supervision of) installation
- Testing & commissioning

Electrical & control systems

- Control & protection systems
- LV & MV switchgear
- Excitation systems
- Transformers & cabling

Across energy and industry

- Hydropower plants
- Thermal power plants – biomass, RDF, CHP
- Industrial production facilities
- Energy infrastructure

1/2 SERVICES

Electrical Engineering Services

Engineering expertise across control, power, automation and commissioning.

01

Engineering & Design

Electrical design | Control & power systems

02

Automation & Control

PLC programming | DCS & SCADA engineering

03

Systems & Protection

Instrumentation systems | Frequency converters
| Electrical protection | Excitation systems

04

Testing & Commissioning

Factory testing |
On-site testing & commissioning

2/2 SERVICES

Digital & Cybersecurity

Reliable networking, computing and cybersecurity for industry and energy.

01

Identity & Access

Active Directory | Authentication | RADIUS

02

Industrial Networks

Segmentation | Redundancy | Failover | Secure VPN

03

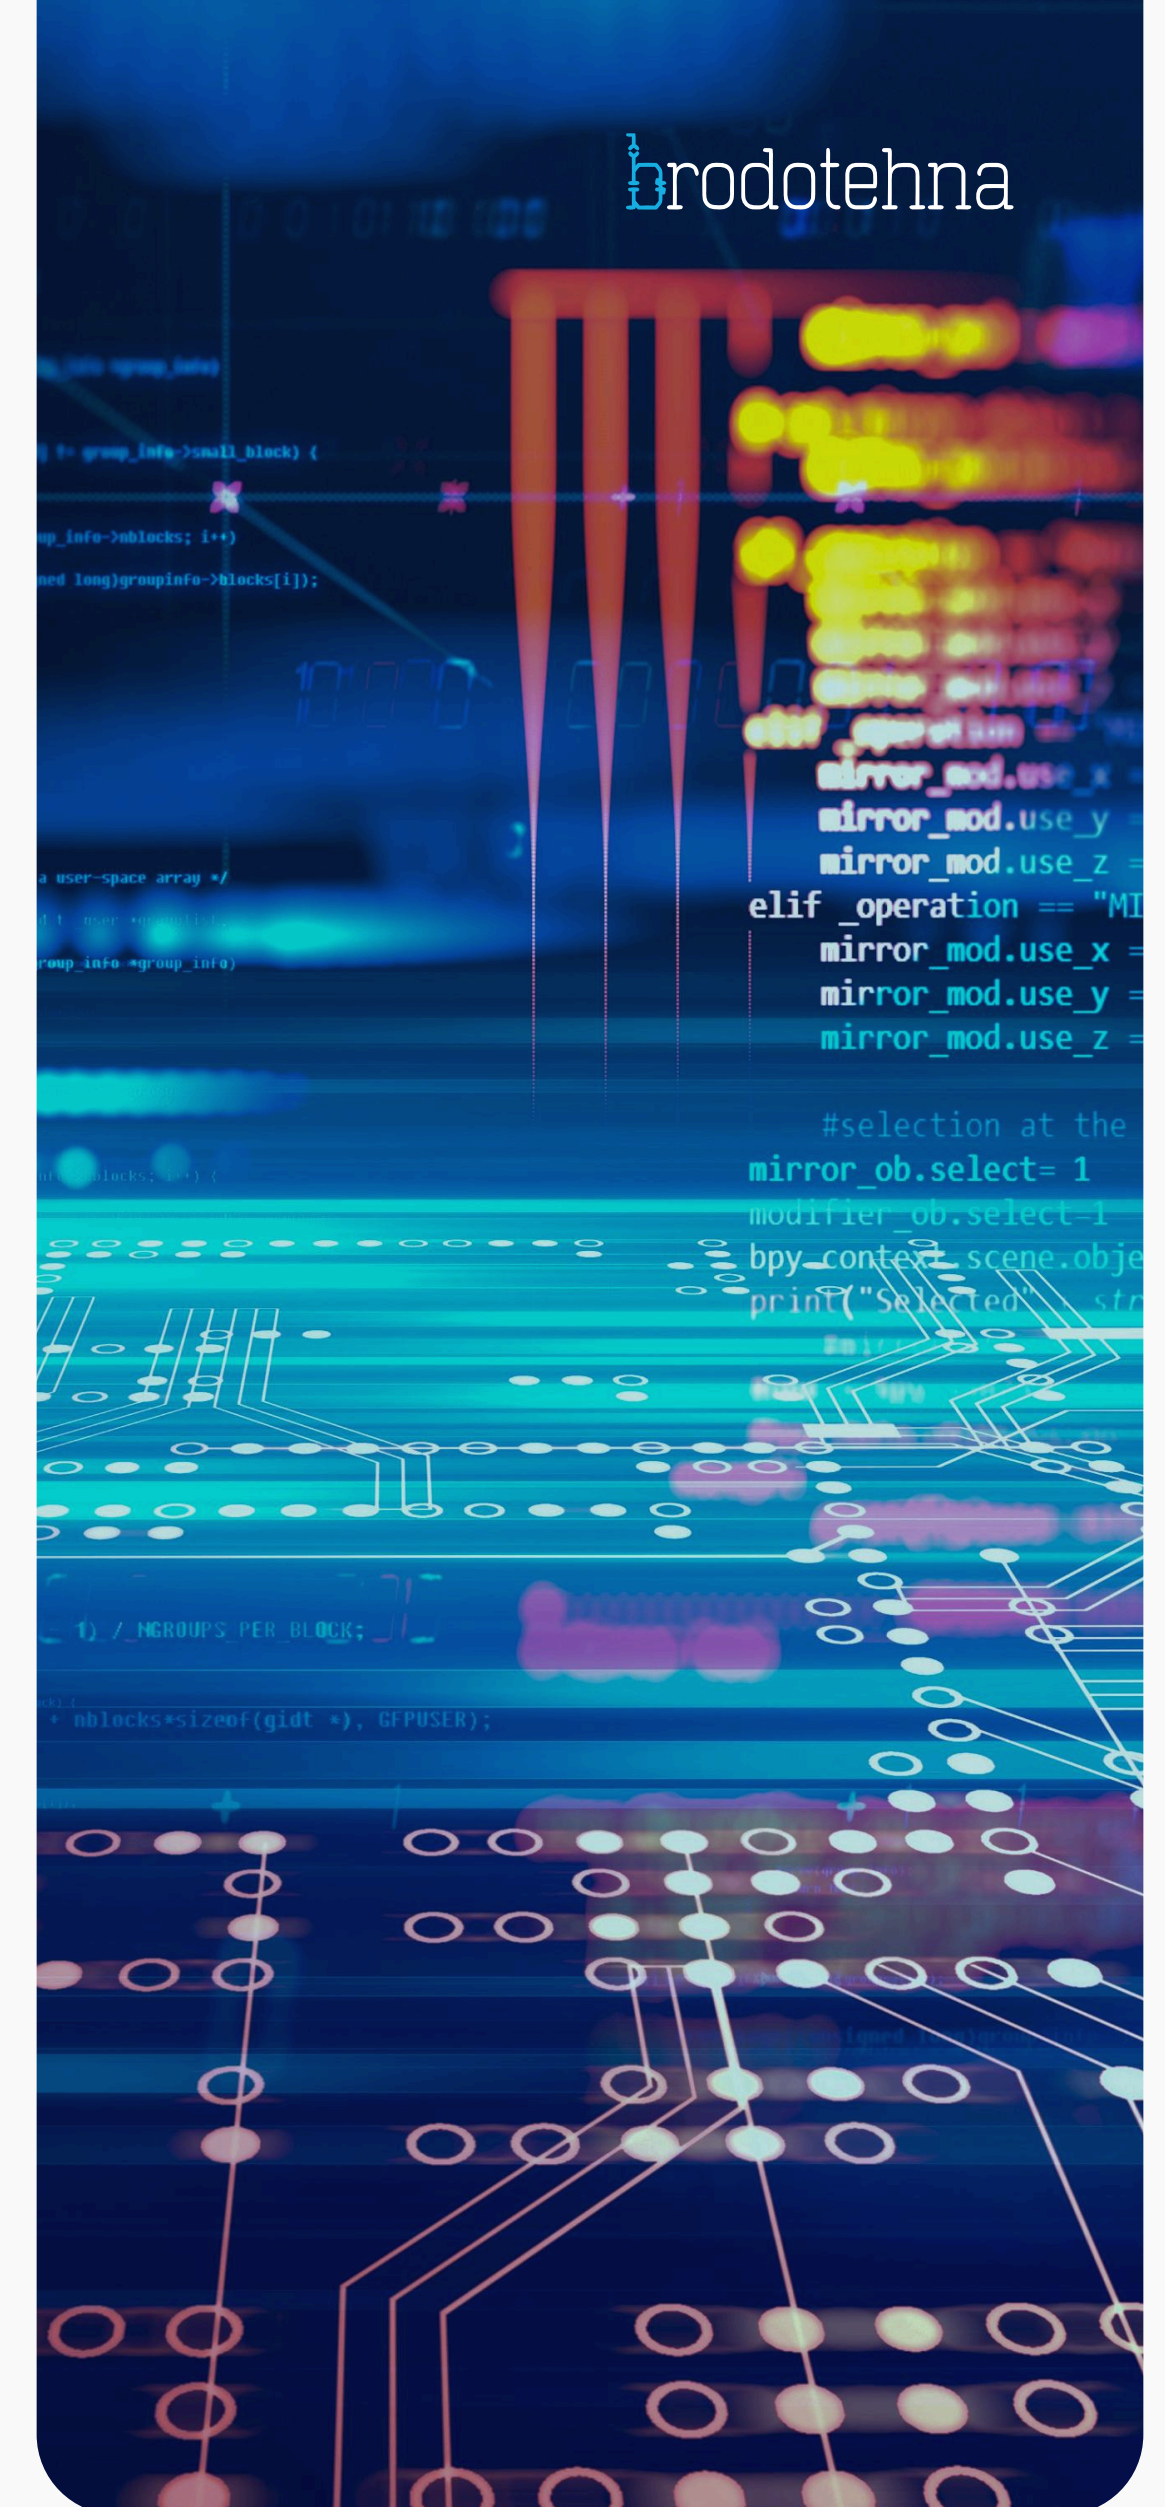

Cybersecurity

Firewalls | Hardening | IEC 62443 | CIS benchmarks

04

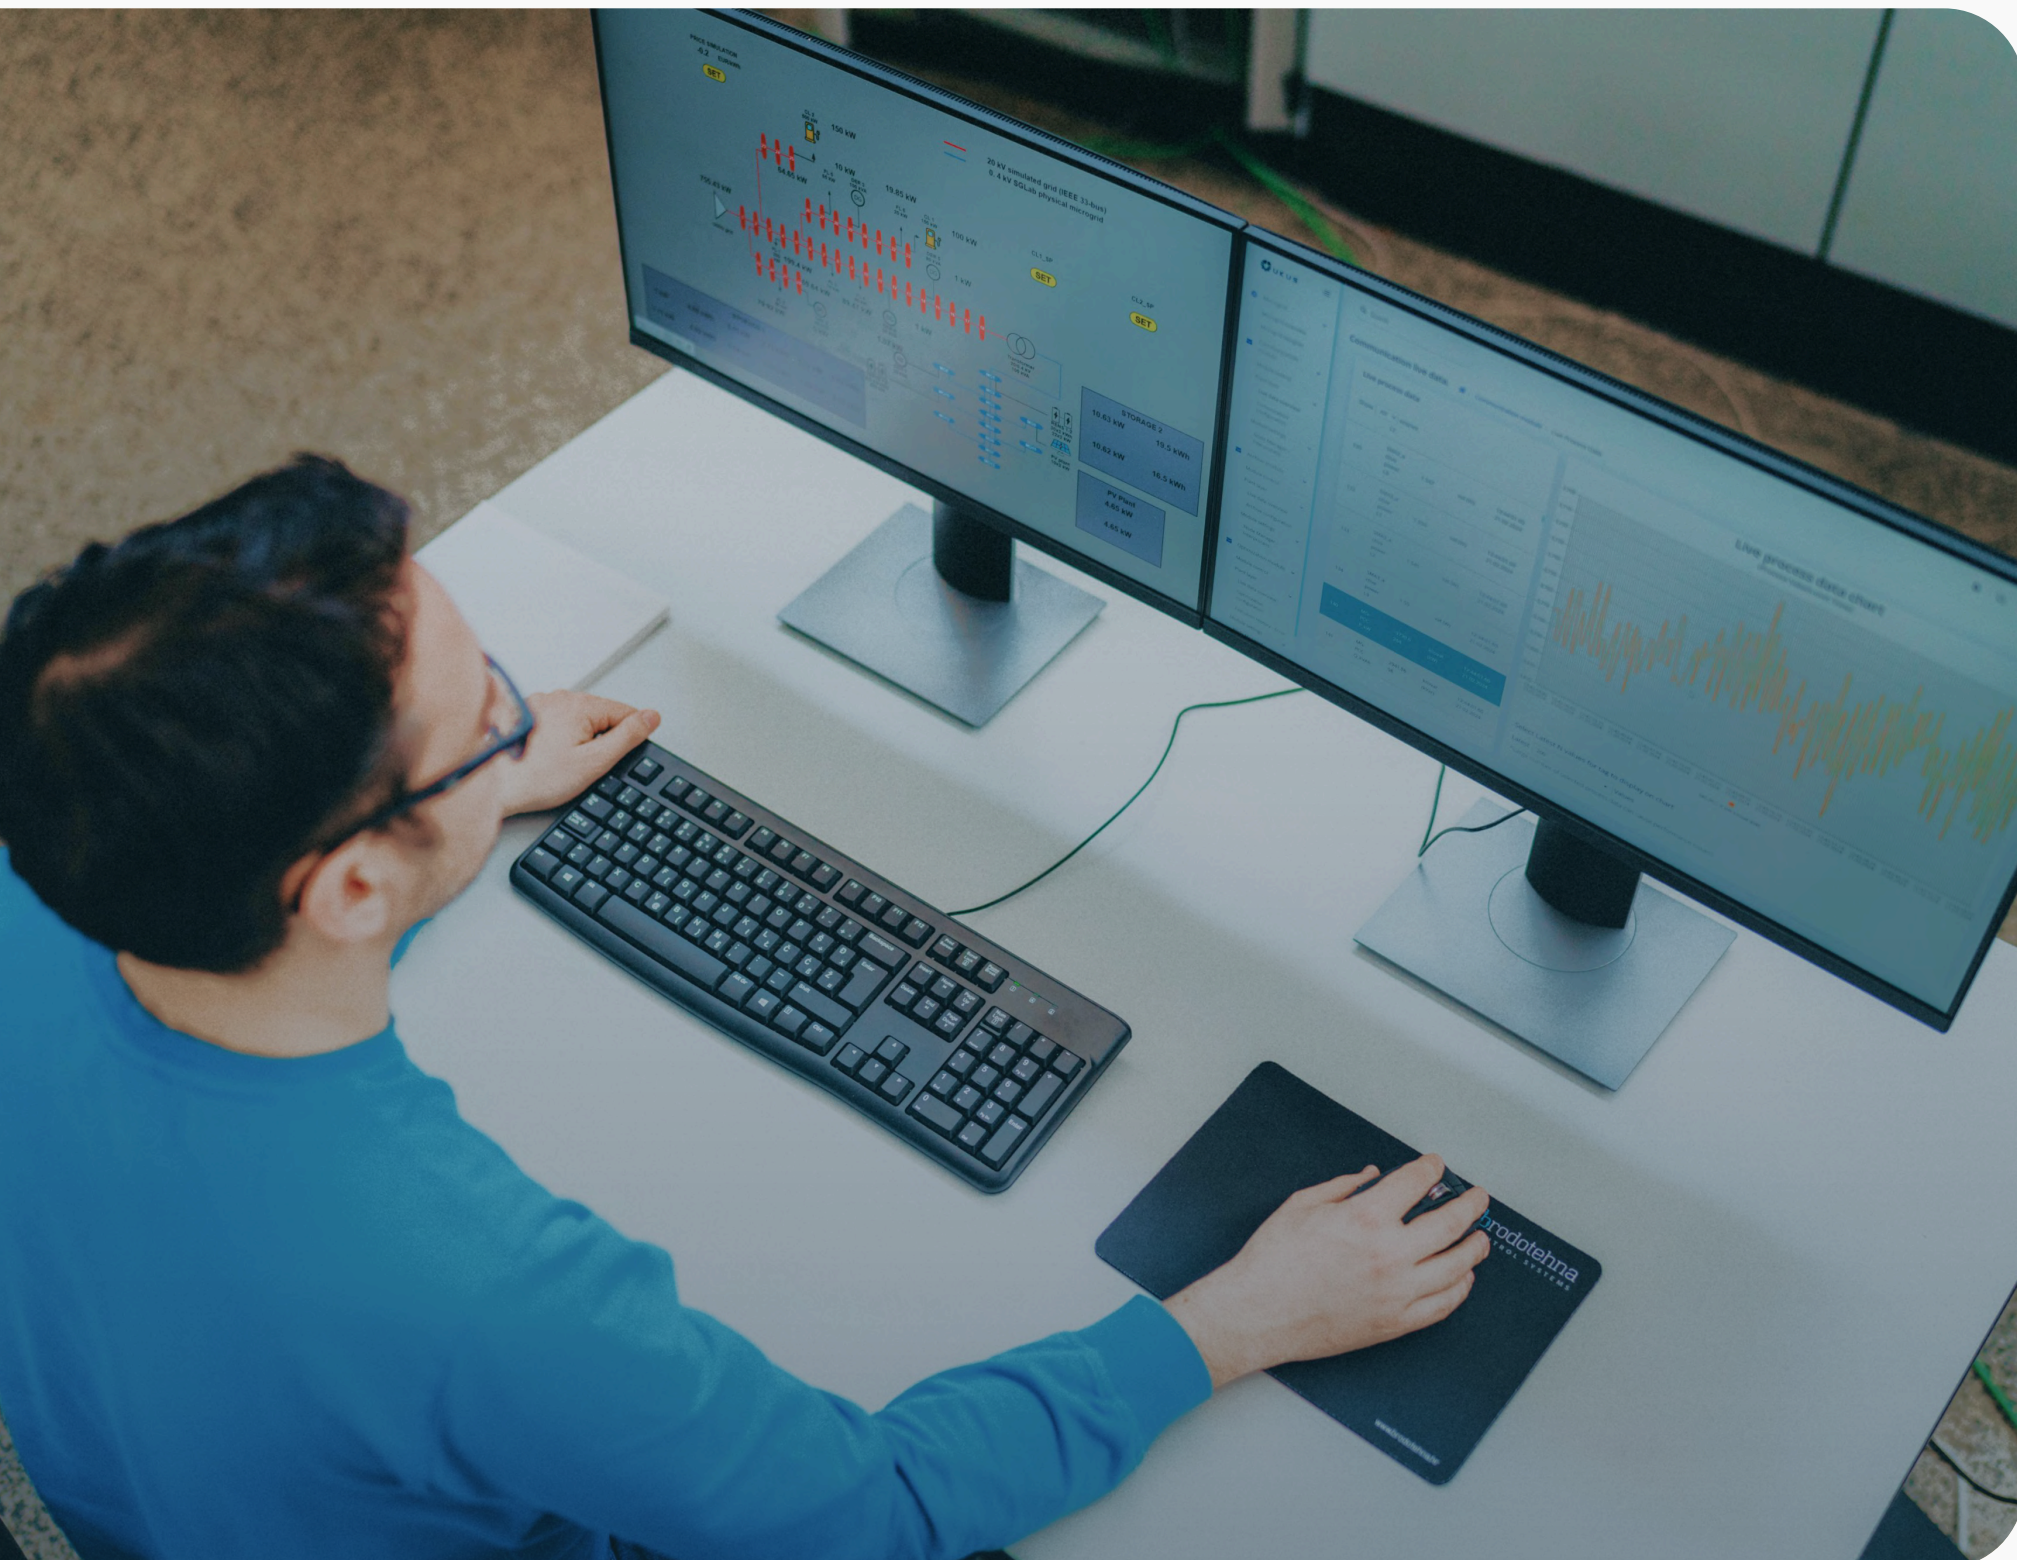

Security Testing

FAT/SAT | Penetration testing | Validation

1/2 DIGITAL SOLUTION MAP

Digital Energy Platforms

ENERGY MANAGEMENT

aEMS

Optimize generation, storage and loads.

VIRTUAL POWER PLANT

aVPP

Coordinate distributed assets and markets.

MICROGRID CONTROL & OPTIMIZATION

aMGC

Balance local generation and demand.

HYDRO + BATTERY OPTIMIZATION

aHydroBESS

Coordinate hydro assets and storage.

2/2 DIGITAL SOLUTION MAP

Control Products

HYDRO TURBINE CONTROL

Digital Governor

Precise control across hydro turbine types and sizes.

SMALL AND MEDIUM HYDRO

Hydro Control System

Integrated control for small and medium hydropower plants.

BOILER & COMBUSTION

Boiler Control

Optimized combustion and steam plant control.

CENTRALIZED OPERATIONS

Remote Control Center

Centralized monitoring and control of distributed plants.

TECHNOLOGIES

Tools & Technologies

Engineering and software technologies supporting our projects from design to deployment.

Engineering & Design

EPLAN

AutoCAD

Revit

Automation & Control

TIA Portal

STEP 7

SICAM Device Manager

RSLogix 5000

SoMachine

800xA Control Builder

DCS & SCADA

InfluxDB

Windows Services

ORGANIZATION

How We're Organized

DEPARTMENTS

Management & Administration

Business operations & coordination.

Electrical Engineering

Engineering, design & control systems.

Computing

Software, data & digital solutions.

OUR TEAMS

- 01 Control Systems Team 1**
- 02 Control Systems Team 2**
- 03 Development Team**
- 04 Electrical Machines & Drives**
- 05 Design Team**

PROJECT DELIVERY

How We Manage Projects

On Time & on Budget

Efficient planning and resource management.

Multidisciplinary Expertise

Combining engineering skills across teams.

Optimized Solutions

Optimizing design solutions to achieve the best project results.

Clear Coordination

Close communication with clients, partners and subcontractors.

01
Contracting

02
Design

03
Procurement

04
Manufacturing

05
Logistics

06
Installation

07
Commissioning

REFERENCE 1

HPP Perućica

📍 Montenegro

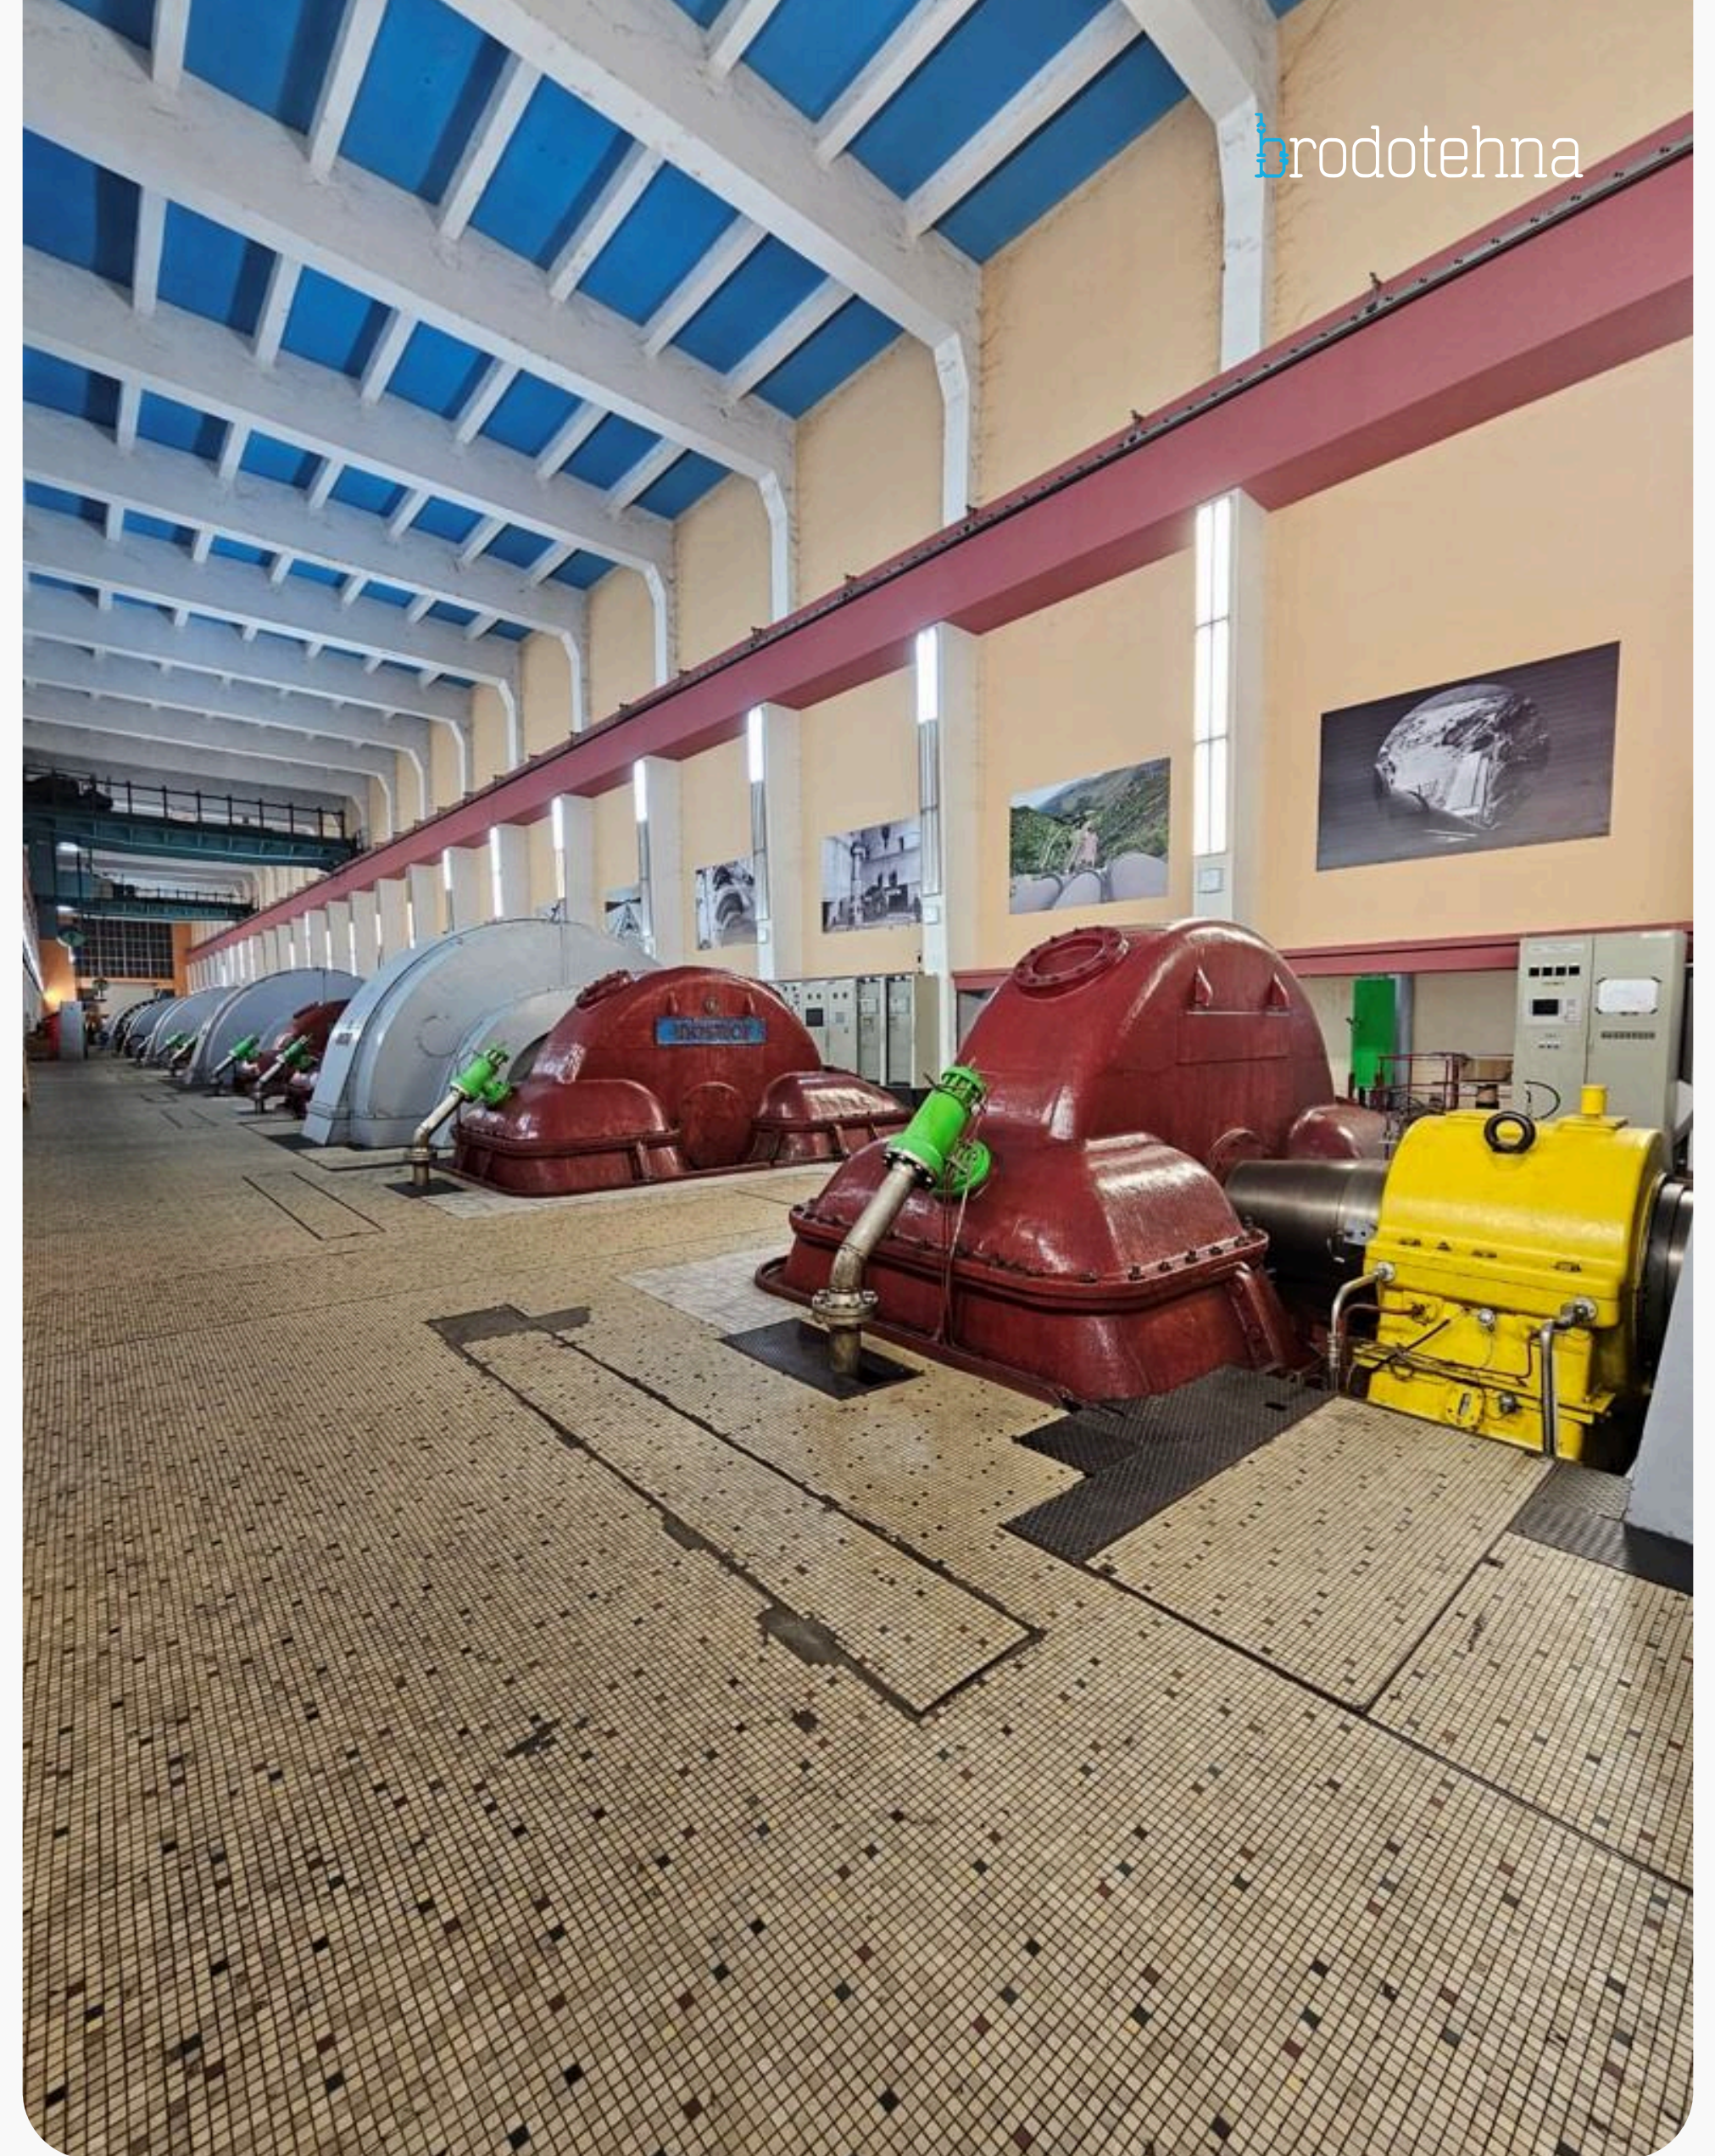

🌐 5 × 35 MW + 2 × 65 MW

HPP Modernization

SCOPE

Design & engineering, Software development, Factory testing, Supervision of installation, Commissioning for:

- **Turbine governors**
- **Unit control systems**

REFERENCE 2

HPP Moco Moco

📍 Guyana 🌐 2x0.4 MW New Hydropower Plant

SCOPE

Design & engineering, Equipment delivery, Factory testing, Installation, Commissioning for:

- **Control and protection system**
- **Auxiliary power supply system**
- **Medium-voltage switchgear**
- **Transformers**

REFERENCE 3

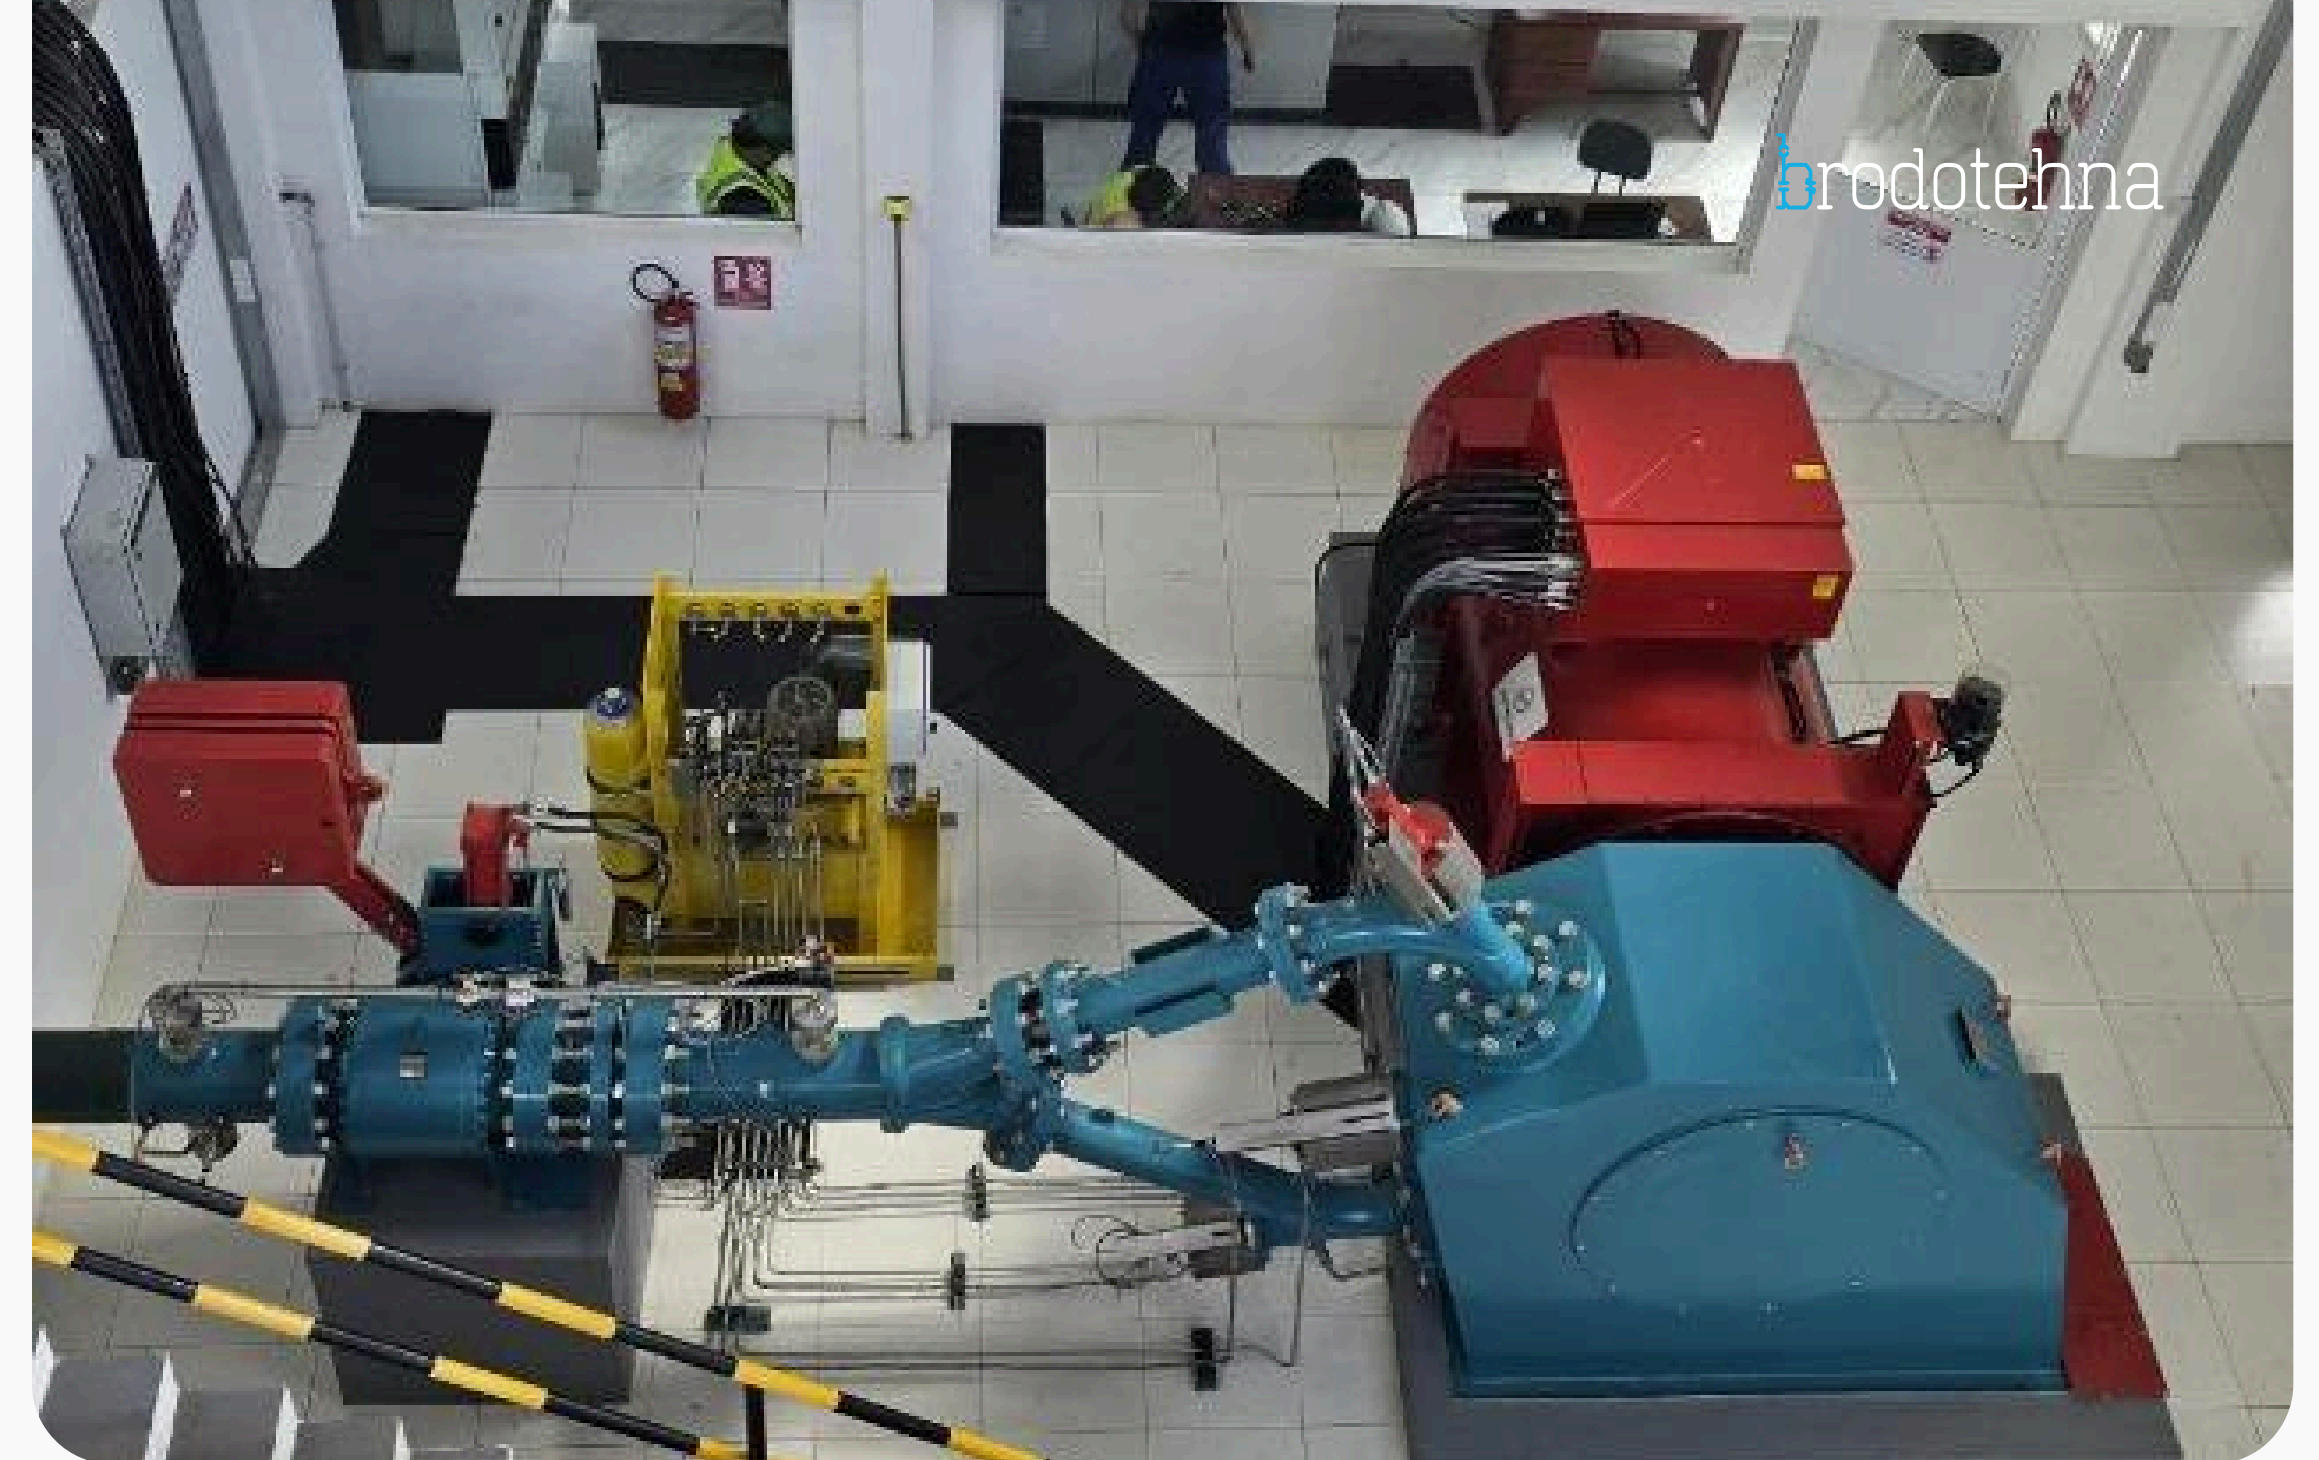

HPP Kumu

📍 Guyana 🌐 1 × 1,7 MW New hydropower plant

SCOPE

Design & engineering, Equipment delivery, Factory testing, Installation, Commissioning for:

- **Control and protection system**
- **Auxiliary power supply system**
- **Medium-voltage switchgear**
- **Transformers**

REFERENCE 4

HPP Great Zimbabwe

📍 Zimbabwe 🌐 2 × 2,5 MW New hydropower plant

SCOPE

Design & engineering, Equipment delivery, Factory testing, Installation, Commissioning for:

- **Control and protection system**
- **Auxiliary power supply system**
- **Medium-voltage switchgear**
- **Transformers**

REFERENCE 5

HPP Nam Mit Luong

📍 Vietnam 🌐 2 × 3,6 MW New hydropower plant

SCOPE

Design & engineering, Equipment delivery, Factory testing, Supervision of installation, Commissioning for:

- **Control and protection system**
- **Medium-voltage switchgear**

REFERENCE 6

RDF Albioma Les Bois Rouge

📍 Reunion 🌐 1 × 40 MWt **Plant expansion - New RDF boiler**

SCOPE

Project management, Design & engineering, Studies (HAZOP, SIL...), Software development, Factory testing, Supervision of installation, Commissioning for:

- **DCS**
- **Instrumentation**
- **Complete LV distribution**
- **Frequency converters**
- **Substation**
- **Diesel genset**
- **HVAC**
- **Lighting and sockets**
- **Lightning protection**

for the new waste-to-energy (WtE) boiler powered by refuse-derived fuel (RDF).

REFERENCE 7

BE Montsinery

📍 French Guiana

🌐 1 × 20 MWt / 7 MWe

New Biomass power plant

SCOPE

Project management, Design & engineering, Studies (HAZOP, SIL...), Software development, Factory testing, Supervision of installation, Commissioning for:

- **Control system**
- **Instrumentation**
- **Complete LV subdistribution**
- **Frequency converters**

for the biomass boiler and water-steam cycle packages.

Thank you!

We look forward to working with you!

📍 SEAT ADDRESS

Ulica Ivana Meštrovića
77, Zadar, Croatia

📍 OPERATING ADDRESS

Ulica Vjekoslava Heinzela
70a, Zagreb, Croatia
